

ARMADILLO ROBOTICS

UNMANNED GROUND VEHICLE · 500KG CLASS

ARMADILLO M-26T

 Danish-designed and manufactured UGV - built for logistics, evacuation and reconnaissance on the front line.

Operational Use

Armadillo performs four core tasks in the field: transport of ammunition, water and supplies to forward units, evacuation of casualties without exposing personnel, and forward observation and reconnaissance.

With a 500 kg payload and an open cargo bed optimised for the EUR pallet, Armadillo integrates directly into existing supply chains. Its modular construction allows the same platform to be quickly reconfigured from logistics to medevac, ISR or a mobile weapons platform.

Mission Profiles

LOGISTICS & SUPPLY

MEDEVAC & EVACUATION

RECONNAISSANCE/ISR

MOBILE WEAPONS PLATFORM

ENGINEERING & DEVELOPMENT

Built on industrial off-the-shelf components. **Low unit cost, scalable production, fast maintenance.** Designed and manufactured in Denmark - own factory, short supply lines, full quality control.

Specifications

RATED PAYLOAD	500 KG
DEAD WEIGHT	560 KG
TOP SPEED	24 KM/H
RANGE	40 KM
BATTERY EXCHANGE (TOOL-LESS)	< 10 MIN.
BATTERY	48VDC · 15 KWH
CHARGE CAPACITY	8 KW
GROUND CLEARANCE	310 MM/LOW COG
CARGO BED SIZE (L×W)	1400×970 MM
LOADING HEIGHT	370 MM
DIM.(L×W×H)	1900×1650×900
TRACKS	COMPOSITE RUBBER
OPERATING TEMP.	-40°C → +60°C (-40°C IN ARTIC VERSION)
